SUMMARY

I'm a highly motivated and experienced software engineer specializing in backend and mobile app development using java, kotlin, dart, javascript and php. I am also keen at sourcing a challenging role in a dynamic organization that will offer early responsibilities, a progressive career path and the opportunity to leverage my skills.

PROFESSIONAL EXPERIENCE

Fullstack Developer at Linkbase Kenya

[Kisumu, Kenya](#) | July 2024 – Present

As a fullstack developer, I am responsible for the database design, ux/ui design, api integration, deployment and maintenance of the company's website. I am also responsible for the development, testing and integration of new features as requested. For this role, I am using laravel, php, tailwind, git, mysql and cpanel.

Freelance Software Developer

[Remote](#) | September 2023 - Present

Worked on multiple freelance projects across different industries including e-commerce, education, entertainment and tech startups. Developing web applications using Laravel, Angular and nodejs. Managed web hosting, deployment and server configuration using cpanel and DigitalOcean

ICT – Intern at Lake Basin Development Authority(LBDA)

[Kisumu, Kenya](#) | May – September 2023

Partnered and collaborated with another intern to develop a web-based-application used by the institution to manage the issuance and circulation of various documents within the institution. Besides this, I was also actively offering tech support to other departments within the organizations. At LBDA, I was able to put my python, django, git and tailwindcss skills to test.
